ELSEVIER

Materials and Design 19 (1998) 79–84

Materials & Design

Index to Volume 18 (1997)

Number 1 pp. 1–52
Number 2 pp. 53–120
Number 3 pp. 121–202
Numbers 4/6 pp. 203–414

Article Index

Number 1

Towards an expert system prototype for composite piezoelectrics design
Q.F. Li, H.F. Liu, J.T. Zhang W.M. Wang, Z.Y. Wang, Q. Liu 1

Carbon–carbon composites: a summary of recent developments and applications
Torsten Windhorst, Gordon Blount 11

The development of a novel rotary damping mechanism for aerospace deployment systems
S. C. Burgess, P. J. Clarkson 17

Microstructural studies on the effect of Si and Cr on the intergranular corrosion in Al–Mg–Si alloys
A. K. Bhattamishra, Kishori Lal 25

Thermal expansion and crown evaluations in rolling processes
A. A. Tseng, S. X. Tong, T. C. Chen 29

Number 2

Composition design of a new type low-alloy high-strength steel
Liu Cheng, Wang DeZun, Liu YunXu, Zhu QiHui, Zhao Yu 53

Finite element analysis of thermal stresses in high-power substrates for hybrid circuits
A. S. Manning, S. Fuchs 61

Influence of interlayer material and geometry on stress levels in $MgO.ZrO_2$–GG coatings subjected to thermal shock
A. Mimaroglu, A. Ozel, S. Genc 73

Influence of porosity characteristics in $MgO.ZrO_2$–GG coating subjected to thermal loading
A. Mimaroglu, U. Kocabicak, S. Genc 77

Hydrogen embrittlement of prestressing steels: the concept of effective stress in design
J. Toribio 81

The reliability of the fracture mechanics approach to environmentally assisted cracking:
1. Uniqueness of the *v(K)*-curve
J. Toribio, V. Kharin 87

The reliability of the fracture mechanics approach to environmentally assisted cracking: 2. Engineering safe design
J. Toribio, V. Kharin 95

Tests on anodised aluminium substrates for hybrid circuits
A. S. Manning, S. Fuchs 103

Number 3

Technology transfer in engineering design: a materials joining consideration
K. L. Edwards 121

Compression ductility of Zn–21 Al–2Cu prepared by powder metallurgy techniques
E. Martínez-Flores, G. Torres-Villaseñor 127

Low-velocity impact damage in glass fibre/epoxy cylindrical tubes
A. B. Doyum, B. Altay 131

Regarding the comparative effect of Si/SiC addition on the microstructure and mechanical properties of an Al alloy processed using disintegrated melt deposition technique
Manoj Gupta, Su Ling 139

Mechanical properties and fractography of cast lead-alloy/quartz particulate composites
S. C. Sharma, K. H. W. Seah, B. M. Girish, R. Kamath, B. M. Satish 149

Hardness of aged ZA-27 / short glass fibre reinforced composites
S. C. Sharma, B. M. Girish, R. Kamath, B. M. Satish, K. H. W. Seah 155

Friction and wear characteristics of Al–Cu/C composites synthesized using partial liquid phase casting process
S. C. Lim, M. Gupta, W. B. Ng 161

Microstructural design of composite materials for crashworthy structural applications
S. Ramakrishna 167

Microstructural design of textile composites
V. K. Ganesh, S. Ramakrishna, S. H. Teoh, N. K. Naik 175

Design considerations for selectively reinforced titanium matrix composites
U. Ramamurty 183

Numbers 4/6

New cars — new materials
Arno Jambor, Matthias Beyer 203

Microstructure and properties of a new super-high-strength Al–Zn–Mg–Cu alloy C912
Y. L. Wu, F. H. Froes, A. Alvarez, C. G. Li, J. Liu 211

Aluminium foams for transport industry
J Baumeister, J. Banhart, M. Weber 217

0261-3069/98/$19.00 © 1998 Published by Elsevier Science Ltd. All rights reserved.

Innovative light metals: metal matrix composites and foamed aluminium
H. P. Degischer 221
Grain growth and grain orientation distribution of Al–Mg alloys
Y. Umakoshi, K. Matsumoto, T. Shibayanagi, H. Morisada 227
Lightweight carbon fibre rods and truss structures
R. Schütze 231
Chemical vapor deposition of titanium nitride on carbon fibres as a protective layer in metal matrix composites
N. Popovska, H. Gerhard, D. Wurm, S. Poscher, G. Emig, R. F. Singer 239
Hot isostatic processing of metal matrix composites
H. V. Atkinson, A. Zulfia, A. Lima Filho, H. Jones, S. King 243
Structure, texture and mechanical properties of AlZnMgCuZr alloy rolled after heat treatments
J. Dutkiewicz, J. Bonarski 247
Pre-ageing of AlSiCuMg alloys in relation to structure and mechanical properties
W. Reif, S. Yu, J. Dutkiewicz, R. Ciach, J. Król 253
Structure and mechanical properties of Al–B composite powder
F. Muktepavela, I. Manika, V. Mironovs 257
Laser beam welding of low weight materials and structures
K. Behler, J. Berkmanns, A. Ehrhardt, W. Frohn 261
Friction stir welding for the transportation industries
W.M. Thomas, E. D. Nicholas 269
Behavior of bubbles in welding for repairs in space
K. Nogi, Y. Aoki 275
Some aspects of solidification and homogenisation of Mg–Ag alloys
A. Rakowska, M. Podosek, R. Ciach 279
Light weight design with light metal castings
D. Brungs 285
Abnormal grain growth in Al of different purity
B. B. Straumal, W. Gust, L. Dardinier, J.-L. Hoffmann, V.G. Sursaeva, L. S. Shvindlerman 293
The dispersion mechanism of TiB_2 ceramic phase in molten aluminium and its alloys
A. Jha, C. Dometakis 297
Influence of the heat treatment on the structure and mechanical properties of the AlZnMgLi alloy
Andrzej Klyszewski 303
A new corrosion protection coating system for pressure-cast aluminium automotive parts
H. Schmidt, S. Langenfeld, R. Naß 309
Lightweight near net shape components produced by thixoforming
G. Hirt, R. Cremer, T. Witulski, H.-C. Tinius 315
Hypereutectic Al–Si based alloys with a thixotropic microstructure produced by ultrasonic treatment
V. O. Abramov, O.V. Abramov, B. B. Straumal, W. Gust 323
The effect of silver addition on 7055 Al alloy
C. W. Lee, Y. H. Chung, K. K. Cho, M. C. Shin 327
Formation and relative stability of interstitial solid solutions at interfaces in metal matrix composites
Simon Dorfman, David Fuks 333
Microcracking at the change of the deformation path of Al rods
M. Kurowski, J. Kuśnierz. A. Grabianowski, E. Bielańska 339
Structure and mechanical properties of age-hardened directionally solidified AlSiCu alloys
Janusz Król 345
Carbon fibre in automotive applications
H. Adam 349
Tensile properties and microstructures of NiAl–20TiB_2 and NiAl–20TiC in situ composites
J. T. Guo, D. T. Jiang, Z. P. Xing, G. S. Li 357
The effect of microstructure on the mechanical properties of two-phase titanium alloys
Jan Sieniawski, Ryszard Filip, Waldemar Ziaja 361
Effect of forging conditions and annealing temperature on fatigue strength of two-phase titanium alloys
K. Kubiak, J. Sieniawski 365
Metallurgical problems associated with the production of aluminium-tin alloys
Tomasz Stuczyñski 369
Investigation of annealing behavior of nanocrystalline NiAl
L. Z. Zhou, J. T. Guo, G. S. Li, L. Y. Xiong, S. H. Wang, C. G. Li 373
Characteristic features of silumin alloys crystallization
Stanislaw Pietrowski 379
The effect of copper addition on the structure and strength on an Al–Li alloy
O. Kabisch, W. Gille, J. Król 385
Erosive wear behaviour of aluminium based composites
Q. Fang, P. Sidky, M. G. Hocking 389
Synthesis and characterization of the Me–HTSC composite
Zvonimir D. Stanković, Lidija T. Mančić 395
Technological aspects of particle-reinforced composites production
Miroslaw Cholewa, Józef Gawronski, Zenon Ignaszak 401

Keyword Index

7055 aluminium alloy
microstructure; mechanical properties 327
abnormal growth
grain growth; grain boundary phase transitions 293
ageing
intergranular; microstructure; segregation; dispersion; intermetallic compound 25
zinc alloy; glass fibre; hardness; composites 155
airframe
Al–Zn–Mg–Cu alloy; high strength aluminium alloys; stress–corrosion resistance;heat treatment 211
AlZn5Mg1 alloy
lithium; structure; properties; heat treatment 303
Al-Li
copper; structure; strength 385
al alloys
corrosion protecting coating; sol-gel derived nanocomposites 309
Al-alloy MMC
aluminium alloys; TiB_2 and dispersed ceramics 297
Al-B powder
disintegration; microhardness 257
Al-Mg alloys
grain orientation; grain boundary 227
Al–Zn–Mg–Cu alloy
high-strength aluminium alloys; stress-corrosion resistance; heat treatment; airframe 211
alloy
deformation; die forging process 365
aluminium
foamed materials; transportation industry 217
hot isostatic processing; metal matrix composites 243
light weight design; magnesium; castings 285
aluminium composites
design analysis; failure prediction; finite element analysis; strain distribution 103
aluminium alloys
Al-alloy MMC TiB_2 and dispersed ceramics 297
aluminium based composites
erosive wear behaviour; ceramic fibres and particles; erosion mechnisms 389
aluminium composite
particle reinforcement; erosive-corrosive wear 410
Aluminium tin alloys
poroduction; metallurgical problems 369
annealing behavior
nanocrystalline NiAl; thermal stability 373
anti-friction
rheocasting; graphite; composites; wear; smearing 161
automotive applications
carbon fibre; non-structural vehicle components 349

bubbles
welding; space repairs 275

carbon matrix composites (A)
fibres and filaments (B); thermal properties (E) 11
carbon fibres
reinforcing metals; metal matrix composites; titanium nitride 239
automotive applications; non-structural vehicle components 349
cars
materials; design; parts 203
castings
light weight design; aluminium; magnesium 285
ceramic fibres and particles
aluminium based composites; erosive wear behaviour; erosion mechnisms 389
ceramic
interlayer; coatings; finite element 73
porosity; thermal loading; finite element 77
cladding
composites; mechanical properties; fatigue life; design 183
coatings
interlayer; ceramic; finite element 73
composite tubes
impact damage; damage detection 131
composites
lead alloy; quartz; particulate; mechanical properties 149
zinc alloy; glass fibre; ageing; hardness 155
rheocasting; graphite; anti-friction; wear; smearing 161
mechanical properties; cladding; fatigue life; design 183
homogeneous; Me-HTSC powders 395
composition design
low-alloy high-strength steel 53
concepts
thixoforming; developments; production 315
copper
Al–Li; structure; strength 385
corrosion protecting coating
sol-gel derived nanocomposites; al alloys 309
crashworthiness
energy absorption; polymer composite materials; crushing 167
crown control
flatness; rolling; rolling mill; thermal crown; thermal displacement potential; thermal expansion; thermal stress 29
crushing
energy absorption; polymer composite materials; crashworthiness 167

damage detection
impact damage; composite tubes 131
deformation
die forging process; alloy 365
design
expert system; piezoelectrics 1
composites; mechanical properties; cladding; fatigue life 183
textile composites; microstructure; mechanical properties 175
cars; materials; parts 203
design analysis
aluminium composites; failure prediction; finite element analysis; strain distribution 103
developments
thixoforming; concepts; production 315
die forging process
deformation; alloy 365
directionally solidified Al-Si hypoeutectic alloys
structural; mechanical; properties 345
disintegration
Al-B powder; microhardness 257
dispersion
intergranular; microstructure; ageing; segregation; intermetallic compound 25

energy absorption
polymer composite materials; crushing; crashworthiness 167
energy dissipation
material damping; resistive torque 17
engineering design
technology transfer; materials joining 121
environmentally assisted cracking
fracture mechanics approach; safe design 87
fracture mechanics approach; safe design 95
erosion mechnisms
aluminium based composites; erosive wear behaviour; ceramic fibres and particles 389
erosive-corrosive wear
aluminium composite; particle reinforcement 410
erosive wear behaviour
aluminium based composites; ceramic fibres and particles; erosion mechnisms 389
expert system
piezoelectrics; design 1

failure prediction
aluminium composites; design analysis; finite element analysis; strain distribution 103
fatigue life
composites; mechanical properties; cladding; design 183
fatigue strength
titanium alloys; microstructure 361
fibres and filaments (B)
carbon matrix composites (A); thermal properties (E) 11
finite element
interlayer; coatings; ceramic 73
porosity; thermal loading; ceramic 77
finite element analysis
aluminium composites; design analysis; failure prediction; strain distribution 103
flatness
crown control; rolling; rolling mill; thermal crown; thermal displacement potential; thermal expansion; thermal stress 29
foamed materials
aluminium; transportation industry 217
foaming aluminium
metal matrix composites; strength values 221
fracture mechanics approach
environmentally assisted cracking; safe design 87
environmentally assisted cracking; safe design 95
friction stir welding
transportation; solid phase 269

glass fibre
zinc alloy; ageing; hardness; composites 155
grain boundary
Al-Mg alloys; grain orientation 227
grain boundary phase transitions
grain growth; abnormal growth 293
grain growth
abnormal growth; grain boundary phase transitions 293
grain orientation
Al-Mg alloys; grain boundary 227
graphite
rheocasting; composites; anti-friction; wear; smearing 161

hardness
zinc alloy; glass fibre; ageing; composites 155
heat treatment
Al–Zn–Mg–Cu alloy; high-strength aluminium alloys; stress-corrosion

resistance; airframe 211
AlZn5Mg1 alloy; lithium; structure; properties 303
high-strength aluminium alloys
Al–Zn–Mg–Cu alloy; stress-corrosion resistance; heat treatment; airframe 211
homogeneous
composite; Me-HTSC powders 395
homogenisation
non-equilibrium solidification; non-equilibrium phases 279
hot isostatic processing
aluminium; metal matrix composites 243
hydrogen embrittlement
prestressing steels; residual stresses 81
hypereutectic aluminium alloys
ultrasonic treatment; thixocasting; mechanical properties 323

impact damage
composite tubes; damage detection 131
in situ composites
tensile properties; microstructures; NiAl-20TiB$_2$ NiAl-20TiC 357
intergranular
microstructure; ageing; segregation; dispersion; intermetallic compound 25
interlayer
coatings; ceramic; finite element 73
intermetallic compound
intergranular; microstructure; ageing; segregation; dispersion 25
interstitial positions
temperature dependence; interstitial solid solution; metal matrix composites 333
interstitial solid solution
interstitial positions; temperature dependence; metal matrix composites 333

laser beam welding
low weight materials; structure 261
lead alloy
quartz; particulate; composites; mechanical properties 149
lightweight carbon fibre rods
truss structures; transportation technologies 231
